New effects include Stop Motion, Zoom and Pan tools in the Action Camera centre, as well as web-like filters (Grunge, lighting effects) with the Video Blending feature.. PowerDirector is available in multiple versions PowerDirector 16 Ultra is the edition we've described here.. PowerDirector 16 Ultimate is the next step up, extending the program with more content packs and effects.

Created something special? The TRUE360 Viewpoint Designer imports 360 degree footage and allows it to be reused, with your choice of views, in standard videos.

cyberlink powerdirector 16

To serve this niche Cyberlink has always offered PowerDirector, whose current version 13.

cyberlink powerdirector 18

The program includes everything you need to create professional videos There's a 100 track timeline to organise your movie; more than 500 effects, transitions and objects to apply; smart filters to stabilise shaky camera work, remove noise and fix lighting issues; powerful audio tools, excellent 3D support, and a huge selection of export options: DVDs, Blu-rays, a host of video formats, direct uploading to Facebook, YouTube, DailyMotion, or your own 25GB of CyberLink cloud storage (free for one year).. But if you can afford it, PowerDirector Ultimate Suite has everything in PowerDirector Ultimate, adds the applications AudioDirector 8 and ColorDirector 6, includes CyberLink's Travel Pack 4 and NewBlue Video Essentials 7, and doubles your cloud storage to 50GB.. There's new support for vertical video at 120 and 240fps All this is powered by the TrueVelocity 6 engine, which apparently offers 'smoother previewing and significantly faster production'.. 31 5 (64-bit)Free, for personal-use only. That would be impressive enough all on its own, but PowerDirector 15 takes the franchise even further with some interesting new and enhanced features.
